What's Inside

1. Prospect Lists -- 5,000+ verified NE Ohio prospects across 3 industries
2. Outreach Templates -- 15 LPL-compliant email and LinkedIn templates
3. Industry Playbooks -- Actionable guides for Dentists, Doctors, and Lawyers
4. Outreach Tracker -- CRM-ready Excel spreadsheet for pipeline management
5. Automation Roadmap -- How manual outreach becomes a fully automated system
6. Next Steps -- The critical questions and immediate actions

1. Prospect Lists

We compiled prospect lists from free public data sources including the NPI Registry (National Provider Identifier -- the federal database of all healthcare providers), Ohio licensing boards, bar association directories, and business filings. Every record includes the provider's name, credentials, practice address, city, phone number, and specialty.

Prospect Counts

Dentists (NE Ohio):	1,670
Physicians (NE Ohio):	3,598
Lawyers (NE Ohio):	70
TOTAL PROSPECTS:	5,338

Top Cities -- Dentists

- CLEVELAND: 206 dentists
- AKRON: 142 dentists
- CANTON: 118 dentists
- BEACHWOOD: 73 dentists
- MENTOR: 64 dentists
- PARMA: 63 dentists
- WESTLAKE: 58 dentists
- MEDINA: 51 dentists

Top Cities -- Physicians

- CLEVELAND: 1378 physicians
- AKRON: 464 physicians
- CANTON: 286 physicians
- WESTLAKE: 195 physicians
- CUYAHOGA FALLS: 115 physicians
- PARMA: 107 physicians
- MEDINA: 64 physicians
- LAKEWOOD: 43 physicians

These lists are delivered as CSV files that import directly into any CRM, email platform, or spreadsheet. Each record is a real, verified professional practicing in Northeast Ohio today.

2. LPL-Compliant Outreach Templates

We created 15 outreach templates (5 per industry) that are pre-vetted against LPL Financial's compliance guidelines. Every template avoids all prohibited terms identified in the FINRA/SIPC Problematic Terms guide and uses only approved language and soft calls-to-action.

Template Types (5 per industry)

1. Cold Introduction Email

Introduces Bryan, references industry-specific pain points, offers a 15-minute conversation.

2. Whitepaper Offer Email

Drives prospects to Bryan's existing lead magnet at checkannuity.com. Educational, no-obligation CTA.

3. Educational Event / Meeting Invite

Invites prospects to a complimentary educational session. Not a sales pitch.

4. Follow-Up After No Response

Gentle second touch with a direct value proposition. Short and respectful.

5. LinkedIn Connection Request

Under 300 characters. Personal, compliant, with a hook relevant to the prospect's industry.

Industries Covered

- Dentists -- 5 templates focused on practice value, tax exposure on sale, fee erosion
- Physicians -- 5 templates focused on hidden 401(k) fees, tax burden, cash balance plans
- Lawyers -- 5 templates focused on income volatility, portfolio fees, buy-sell planning

Compliance Verification

Every template has been checked against the full LPL Problematic Terms guide. No prohibited terms are used. All calls-to-action are soft and educational. Required disclosures (entity name, LPL/FINRA/SIPC) are included in every email. A detailed compliance audit is included with the template file.

IMPORTANT: While these templates are designed to be compliant, they should still be submitted to LPL's compliance team for formal approval before use in any client-facing campaign.

3. Industry Playbooks

We created detailed, actionable playbooks for each of Bryan's three Tier 1 industries. Each playbook is designed to be printed and used immediately.

Dentists (Priority #1)

- Pain points: 60-80% net worth in practice, succession gap, 30-40% tax loss on sale
- Key associations: Greater Cleveland Dental Society, Akron Dental Society, NEODS, ODA
- Best channel: Dental study club presentations (20-min talk)
- COIs: Dental CPAs, practice brokers (AFTCO, Henry Schein), supply reps
- Outreach sequence: Day 1 email -> Day 3 LinkedIn -> Day 6 follow-up -> Day 10 whitepaper -> Day 15 call -> Day 20 event invite
- Talk track and qualifying questions included

Physicians (Priority #2)

- Pain points: 37%+ tax rates, hidden 401(k) fees, student debt vs wealth building
- Key associations: AMCNO, OSMA, APPNA-NEO
- Best channel: CPA referrals, educational dinner seminars
- COIs: Medical practice CPAs, malpractice attorneys, hospital admin contacts
- Outreach sequence: Same 20-day cadence tailored for physician messaging
- Talk track and qualifying questions included

Lawyers (Priority #3)

- Pain points: Income volatility, 50%+ tax rates, no pension, hidden fees
- Key associations: CMBA (~5,000 members), Akron Bar, OSBA
- Best channel: CPA/estate attorney referral networks, CMBA events
- COIs: CPAs serving law firms, estate planning attorneys, legal recruiters
- Outreach sequence: Same 20-day cadence tailored for attorney messaging
- Talk track and qualifying questions included

Full playbooks are delivered as a separate document with complete association contact information, event calendars, conversation scripts, and step-by-step outreach instructions.

4. Outreach Tracker

We built a CRM-ready Excel spreadsheet for tracking all prospecting activity. This tracker is designed to be used immediately for manual outreach and to import cleanly into any CRM platform as the system scales.

Features

- 33 columns covering prospect data, outreach activity, responses, and pipeline status
- Auto-filters and frozen headers for easy sorting and searching
- Built-in dashboard tab with live metrics (total prospects, response rate, meeting rate)
- Reference tab with status options, channel types, and industry categories
- Columns for up to 3 outreach touches per prospect with date, channel, and template tracking
- CRM-importable format (imports directly into HubSpot, Salesforce, Pipedrive, etc.)

This spreadsheet is the bridge between manual outreach and automation. Every data point captured here feeds directly into the automated CRM system we will build as the engagement scales.

5. Automation Roadmap

Everything in this package is designed to convert from manual processes into fully automated systems. Here is the roadmap for that transition.

Phase 1: Manual (Now)

- Prospect lists built from free public databases
- Outreach templates personalized and sent manually
- Activity tracked in Excel spreadsheet
- Follow-ups managed by calendar reminders

Phase 2: Semi-Automated (Month 2-3)

- Automated prospect list scraping -- Python scripts pull fresh data from NPI, licensing boards, FMCSA on a schedule
- AI-powered compliance checker -- scans any draft content against LPL prohibited terms before submission
- Template personalization engine -- automatically fills templates with prospect data from the list
- CRM integration -- move from spreadsheet to a real pipeline dashboard with automated follow-up reminders

Phase 3: Fully Automated (Month 4-6)

- Automated email sequencing -- compliant outreach fires on schedule with no manual intervention
- LinkedIn automation -- connection requests and messaging at scale
- Lead scoring -- AI ranks prospects by likelihood to convert based on engagement signals
- Meeting booking -- automated calendar integration so prospects self-schedule
- Reporting dashboard -- real-time metrics on outreach volume, response rates, meetings booked, and pipeline value

THE VISION: Bryan wakes up, checks his calendar, and sees meetings with pre-qualified prospects who already understand what he does. Simpl ABI handles everything before that meeting -- from finding the prospect to warming them up to booking the appointment.

6. Immediate Next Steps

1. Resolve the LPL Compliance Question

Before any outreach goes live, we need clarity on: Can templates be pre-approved for reuse? Does 1-to-1 correspondence require the same approval as mass marketing? Is non-securities educational content exempt? This determines our launch speed.

2. Review and Select Priority Prospects

From the 5,000+ prospect list, we recommend selecting the top 50 across all three industries to begin outreach. We will prioritize by geography (closest to Hudson), practice type (private practice owners), and specialty alignment.

3. Submit Templates to LPL for Approval

Send the 15 outreach templates to LPL compliance for review. If batch approval is available, submit all at once. Target: have approved templates ready to deploy within 1-2 weeks.

4. Launch Manual Outreach

Begin the daily outreach cadence: 10-15 personalized emails per morning, 10-15 LinkedIn connection requests at midday, follow-up management in afternoon. All activity tracked in the Excel spreadsheet.

5. Schedule Automation Build

While manual outreach runs, Simpl ABI begins building the automated systems (scraper scripts, compliance checker, personalization engine) so the transition from manual to automated is seamless.
