

Marketing Takeover Roadmap

A phased system for taking over your marketing and outreach
— from quick wins to full-scale automation.

Prepared May 2026 • Confidential

Roadmap Overview

We take over your entire marketing and outreach operation — starting with the actions that deliver the most value with the least effort, then systematically building toward a fully automated growth system. Every tier builds on the last. Nothing is wasted.

How We Prioritize

Value-First Ordering

Every action is ranked by the ratio of business impact to setup effort. We always tackle the highest-value, lowest-friction items first so you see returns before the invoice hits.

Manual Now, Automated Later

We don't wait for perfect systems. If a partially-manual process delivers results today, we ship it and automate it later. You get value now while the machine gets built behind the scenes.

Tier 1: Quick Wins

DAYS 1-14 • HIGHEST VALUE, LOWEST EFFORT

These are the actions we execute immediately. Some are fully automated from day one; others start with a manual component that we progressively automate. The goal: visible, measurable results within two weeks.

EXPECTED IMPACT

1. Google Business Profile — Claim and Optimize

This is the single highest-impact free marketing asset for any local business. Most competitors have incomplete profiles. A fully optimized listing immediately improves local search visibility, Google Maps placement, and customer trust.

ACTION	TYPE	TIMELINE	IMPACT
Claim or verify Google Business Profile ownership	Setup	Day 1	Critical
Complete every field: hours, services, description, attributes	Manual	Day 1-2	High
Upload 15-25 high-quality photos (storefront, team, work)	Manual	Day 2-3	High
Write keyword-rich business description	Manual	Day 1	Medium
Set up messaging and Q&A responses	Setup	Day 2	Medium
Create first 3 Google Posts (offers, updates, events)	Manual	Day 3-5	Medium

2. Review Generation System

Reviews are the #1 trust signal for new customers and directly affect search rankings. We build a simple system to request reviews after every completed job — starting manual, then automated.

ACTION	TYPE	TIMELINE	IMPACT
Create a direct Google review link for easy sharing	Setup	Day 1	Critical
Draft 3 review request templates (email, text, in-person script)	Manual	Day 2	High
Send review requests to 20 most recent happy customers	Manual	Day 3-5	Very High
Set up post-service review request (manual trigger initially)	Process	Day 5-7	High
Respond to every existing review (positive and negative)	Manual	Day 3-5	Medium

3. Lead Capture — Stop Losing Potential Customers

Right now, potential customers visit the website, see a social post, or hear about the business — and there's nowhere for them to go except maybe a phone number. We fix that immediately.

ACTION	TYPE	TIMELINE	IMPACT
Add a simple contact/quote request form to the website	Setup	Day 1-2	Critical
Set up a dedicated business email for inquiries	Setup	Day 1	High
Create a simple lead tracking spreadsheet or free CRM	Setup	Day 2-3	High
Add click-to-call and click-to-text buttons on mobile site	Setup	Day 2	High
Install a free chat widget for website visitors	Setup	Day 3-5	Medium

4. Social Media Quick Wins

We're not building a content empire yet — just establishing presence, claiming profiles, and posting enough to show the business is active and legitimate.

ACTION	TYPE	TIMELINE	IMPACT
Claim/update profiles on Facebook, Instagram, and relevant platforms	Setup	Day 1-2	High
Ensure NAP consistency (Name, Address, Phone) across all listings	Manual	Day 2-3	High
Post 5-7 initial posts (before/after work, team, customer wins)	Manual	Day 3-7	Medium
Follow and engage with 20-30 local accounts and partners	Manual	Day 5-10	Medium

5. Email Signature Marketing

Every email the business sends becomes a marketing touchpoint. This costs nothing and takes 30 minutes.

ACTION	TYPE	TIMELINE	IMPACT
Design a branded email signature with logo, contact info, CTA	Setup	Day 2	Medium
Add a current promotion or review link to the signature	Manual	Day 2	Medium
Deploy across all team members' email accounts	Setup	Day 3	Low-Medium

What You'll Have After 14 Days

- A fully optimized Google Business Profile appearing in local search results
- A review generation process producing 5–15 new reviews in the first month
- A working lead capture system so no inquiry falls through the cracks
- Active social media profiles with initial content establishing credibility
- Every outgoing email promoting the business passively

Tier 2: Foundation

WEEKS 3-6 • BUILD THE MACHINE

With Tier 1 generating leads and visibility, we now systematize everything. The goal: turn manual processes into repeatable systems, launch email marketing, and build a content pipeline.

End of Tier 2

The business now has a repeatable marketing system: leads come in, get nurtured automatically, convert to customers, get asked for reviews, and generate referrals. Most competitors never reach this level of organization.

Tier 3: Growth Engine

MONTHS 2-3 • POUR FUEL ON THE FIRE

The foundation is set. Now we add paid acquisition, build referral loops, and create a marketing analytics system so every dollar spent is tracked and optimized.

The End State

A fully automated marketing and outreach system that:

- Generates leads predictably across multiple channels
- Nurtures and converts leads without manual intervention
- Retains customers and generates referrals on autopilot
- Provides complete visibility into ROI for every dollar spent
- Continuously optimizes itself based on performance data

Each tier builds on the previous. Timeline estimates assume dedicated execution.
Individual actions can be reprioritized based on your specific business needs and opportunities.
